January 7, 2019

To Whom It May Concern:

This letter is in regards to your request for a Letter of Guarantee from UW Provisions, Inc., USDA inspected official establishment number of 17151.

All the products produced by UW Provisions, Inc. sent into commerce for sale to the public will be produced from only raw materials produced from USDA-FSIS inspected slaughter and processing facilities operating under approved HACCP inspection programs and HACCP systems. Raw materials suppliers of products received into UW Provisions, Inc. are required to also operate under inspected, approved HACCP systems, including implemented SSOP's, other pre-requisite programs, and ancillary programs when required. This is to ensure all products that are received into UW Provisions, Inc. are adequately following applicable food safety criteria. These raw material suppliers are required to update UW Provisions, Inc. when pertinent changes are made to their HACCP system.

Our suppliers are required to operate under FSIS Notice 05-07, relating to SRM's that was issued January 23<sup>rd</sup>, 2007. All bone-in beef received through our receiving program shall be aged at under 30 months, or will have records complying to SRM removal regulations.

Additionally, as trichina has not been a hazard in domestically raised pork in the United States in decades, and since we only receive pork products from domestic herds, records addressing trichina are unnecessary.

UW Provisions, Inc. will operate under HACCP plans that will contain at least one CCP, that along with SSOP's and other pre-requisite programs, is designed to prevent, eliminate or reduce a hazard to an acceptable level. Our HACCP system has been validated and is reassessed for validation at least once per year.

At UW Provisions, Inc, we aim for happy customers and producing quality products, our number one goal.

Thank you,

*Dale Syse*
